

Hello How are you? How are you? Nice to meet you. My name is José Pérez. We have made this video with a person close to you. We wanted first-hand information regarding the enormous benefits that windowscom.

offers itself to me as its founder and as its director, it is a great pleasure and a pleasure to be able to share with you the information of this concept that we are so excited about because due to its purpose and.

intention we are sure that it will benefit many people we would have loved to see you in a cafe to talk personally but as this is not possible we will do it virtually thanks.

to the possibilities that technology offers us today and in fact that is one of the main objectives it offers is to provide people with the new tools that technology today offers us..

offer to prosper and improve our quality of life.

How good in this case we are going to make another mind of these possibilities and I am very pleased through them to be able to share this important information with you, I welcome you and we go, then direct.

to the subject, share you on my tablet to support me in this explanation. Well, the first thing I would like to tell you about is that gwinnett is at this moment a tremendous opportunity since it is aligned with the circumstances of.

the new normal and due to its products, services and business model, it offers simple solutions to needs and problems that today it is estimated that at least one in three people will need to solve Me.

I mean the need to integrate and adapt to this new world in which the digital element is one of the most important for economic development from now on, number two.

have more than one source of income, because due to the speed.

With technology making things change today, no one can know if our business or employment in the coming years, even months, may be obsolete and necessary or replaced by Artificial Intelligence.

Well, what is winger? Mira widget is a means of contact and commercial interaction through which people can carry out one of the most decisive activities in their economic results, particularly today.

Today I mean to promote in the best possible way their talents, experience and their respective economic activities with widget, they can also boost them since at the same time significant additional income can be generated with.

which can grow the self-leveling obtain resources to launch their business projects or simply create a new and powerful source of income in a simple way wingard is a platform that integrates several options that.

people have used.

To promote and publicize your products and services now in digital versions, for example, I refer to print advertising such as flyers and newspaper brochures of promotions and match offers in main streets directories.

commercial and social activities to meet people who may be customers or business partners, now they will be at your service and in the palm of your hand at windycom.

Now, the fact that these versions are digital provide important advantages and benefits, the first one evidently

facilitates the integration to the New World of the important digital economy so as not to be left behind or at a disadvantage..

makes the benefits of these promotional options accessible to everyone because How can we realize promoting annually in these media required significant investments that were beyond the reach of most and.

three allows us.

Participate in an accessible way in the most powerful business phenomenon today since gwinnett is also a similar collaborative platform, for example Uber to Facebook erbienvi Instagram among others How can you tell talk about.

these collaborative platforms is to refer to the business models that have created the fortunes of several of the richest people today, what we are not aware of is that we have been.

even main protagonists of the creation of said multimillion-dollar fortunes, since these platforms are called collaborative precisely because of the contribution we make in their creation, exponential expansion and interaction, either because the.

we find interesting fun or by accessing promotions and discounts of some of their services we have shared them with different people belonging to our contact network.

In this way we have developed, for example atvs to the largest taxi company in the world without having a single vehicle in property, which boiled says the company with the largest number of accommodation spaces.

without investing a single peso in infrastructure and, for example, for Facebook to be the most successful entertainment medium today, which at least and equaled in popularity to radio and television without.

However, generating content represents large investments for radio and television and Facebook does not generate any cost since we are the same users who, when interacting on the platform, generate that content.

And in this case for free so as you can see we have been the link between these platforms and new users.

This is in short the collaborative phenomenon, what? How you can tell is the sum of the power of technology and the power of people however.

Despite the collaboration that we have clearly done for the success of these platforms, we have not had any economic benefit and this is simply because those platforms, those business models were not created with that.

intention, but this is the good news, that we want to share with you this day of Winx and it has been created precisely with the intention of providing the maximum possible benefits for its members and due.

To this end, it has created the necessary conditions to carry out this objective..

Now we can unite to make the beneficiaries of the wealth that we are able to generate through a platform in this case or inject something, you would be inconvenienced in taking advantage of this for your own economic benefit..

The same collaborative power that these successful businesses used, I imagine that this is not true, especially what win10 is about, what we now put in your hands and at your service now well.

To achieve the maximum benefits for widget members, a system of financial rewards has been created that is

unprecedented since this simple accessible, equitable and very generous, since shared among its members the.

80% of the profits and this without any type of requirements or locks typical of referral systems that perhaps you know or have been offered before And this is something that makes it unique probably Already.

You saw the video of the products, the digital card of an example this time, I will only tell you about the modality of a new version of networking included in widgets, we call it social networking the conventional model.

Networking consists of the organization of social events, where people seek to increase their contacts and meet clients allied partners or all kinds of people who could enhance their economic activities and for this, logically.

The extraordinary thing in the case of gwinnett is that its memberships not only give you access to its products and services, but the resources generated by these are.

used to reward their members and support their economic activities due to this the first benefit, what system offers you is to recover your investment immediately, which you can achieve by simply referring to a.

person who wants to promote themselves and easily generate additional income in this way practically the benefits of Windows products, services and businesses you have it for free and this is extraordinary Now only with reference to.

one more person can activate a mechanism that can generate conditions of \$ 502000 or \$ 6000 over and over and over again in an unlimited repetitive way, the most incredible thing is that you can access these benefits.

With an investment of only \$ 700 VAT included well, I know that all this may seem incredible to you But keep in mind that all this is possible.

Thanks, because we are taking advantage of the collaborative phenomenon, which I told you about, thanks to the purpose of gwinnett and consequently to the characteristics of its reward system..

several options, the person with whom you are finally talking, Well, I invite you to know more about the origin of the widget of its products and services, I would also like to show you How And why Windows can help you.

to get all the money you need by dedicating yourself to the business activity profession that you like and like the most and also to see how you can break the vicious circle that prevents us from having the.

enough time and money.

To finally enjoy an extraordinary life, allow me to present this information for you to your network of contacts so that you can see how it can work for you since as you can see, there is no.

nothing to lose and yes much to gain.
